FashionRise · Create Real Design Technical Pack

Look · Oct 25, 2026

Pack type: PDF-only update ($0 assembly · reused AI Professional arts) · **Readiness:** DESIGN CONCEPT / DRAFT · Schematics NOT TO SCALE · AI completion ≠ sample-development ready

Style number	FR-3958
Revision	3
Status	DRAFT / UNVERIFIED
Generation	PDF-only update ($0 assembly · reused AI Professional arts)
Look ID	3958812c-31ce-4db0-87f1-0811975050f5
Size system	EU
Sample size	—
Units	cm
Outfit pieces	2
Components	TOP: Top, BOTTOM: Shorts

DRAFT / UNVERIFIED. Technical flats and pattern pieces are PATTERN DEVELOPMENT SCHEMATICS — NOT TO SCALE. Patternmaker review required.

Look notes

A clean, sporty look pairs a lavender zip-front hoodie with sunny golden-yellow shorts.

Design overview

Authenticated Magic references only. Missing opposite sides are not invented. Technical flats for manufacturing appear on component sheets.

Front Magic look

Back Magic look

Look image unavailable — not fabricated.

Shared preferences

Fit preference	regular
Preference notes	—
Detection confidence	heuristic

Body measurements (shared)

Body points appear once for the outfit. Do not confuse with finished-garment POMs.

Point	Value	Source	Confidence	Note / assumptions
Height	176 cm	Designer	—	—
Bust	100 cm	Designer	—	—
Waist	90 cm	Designer	—	—
Hip	110 cm	Designer	—	—
Inseam (body)	80 cm	Designer	—	—

Measurement review warnings

• Named sample size is missing. Sample-development packs require a confirmed sample size (size system currently “EU”).
• Garment length (HPS to hem) = 110 cm is outside the usual 45–85 cm band for a top. Designer value preserved — confirm measuring method (High point of shoulder (HPS) straight down to hem.) or correct the value before sample development.
• HPS-to-hem length = 110 cm but the design notes describe a hip-length top. Confirm whether this is a full-body / dress length or a data entry error.
• Body bust = 100 cm and finished chest = 100 cm with relaxed fit. Confirm intentional zero ease / stretch, or correct values.
• Inseam = 80 cm is outside the usual 5–35 cm band for a shorts. Designer value preserved — confirm measuring method (Crotch seam to hem along inner leg (finished garment).) or correct the value before sample development.

• Shorts finished inseam = 80 cm while the silhouette describes mid-thigh / above-knee shorts. Confirm measuring method or correct the POM.
• Body waist = 90 cm but finished waist = 75 cm without confirmed stretch/elastic construction. Confirm elastic/drawcord/knit stretch or correct measurements.
• Body hip = 110 cm and finished hip = 110 cm with regular/relaxed fit claimed. Finished garment usually needs ease — confirm skin-tight intent, stretch fabric, or correct POMs.
• Category “top” requires explicitly confirmed finished POMs ['chest_bust', 'garment_length', 'shoulder_width', 'sleeve_length'] (source=designer alone is insufficient). Present but not review-confirmed (open/needs_review/AI/estimate): ['chest_bust', 'garment_length', 'shoulder_width', 'sleeve_length'].
• Fit/ease for “Top” lacks explicit review confirmation. Provenance-only designer source does not count.
• Shell material/composition for “Top” must be explicitly confirmed (color lists, estimates, and open review are insufficient).
• Closure/fastener for “Top” is unconfirmed. Boolean placeholders, AI guesses, and open review are not manufacturing specs.
• Construction decisions for “Top” are missing or only generic defaults. Explicitly confirmed steps are required.
• POM tolerances for “Top” are not explicitly confirmed for the intended sample.
• Detail artwork has not been independently visually confirmed for this garment. Artifact↔piece IDs and analysis text are not proof of correct image content.
• Category “shorts” requires explicitly confirmed finished POMs ['waist', 'hip', 'inseam', 'front_rise', 'leg_opening'] (source=designer alone is insufficient). Present but not review-confirmed (open/needs_review/AI/estimate): ['waist', 'hip', 'inseam', 'front_rise', 'leg_opening'].
• Fit/ease for “Shorts” lacks explicit review confirmation. Provenance-only designer source does not count.
• Shell material/composition for “Shorts” must be explicitly confirmed (color lists, estimates, and open review are insufficient).
• Closure/fastener for “Shorts” is unconfirmed. Boolean placeholders, AI guesses, and open review are not manufacturing specs.
• Construction decisions for “Shorts” are missing or only generic defaults. Explicitly confirmed steps are required.
• POM tolerances for “Shorts” are not explicitly confirmed for the intended sample.
• Owner QA: detail sheet linked to shorts ID visually shows hoodie construction (zipper/hood/sleeve). Original file preserved; exclude from corrected preview — do not treat as shorts manufacturing evidence.

Component: TOP — Top

Category: top · Garment color: Lavender/purple · Detection: heuristic

Materials & construction identity

Garment color	Lavender/purple
Color evidence	visually supported analysis
Shell material	cotton
Composition	Unknown / not confirmed
Fabric structure	knit/woven — not confirmed
Stretch	not confirmed
Weight / GSM	not confirmed
Lining	—
Rib / band	—
Closure / fastener	—
Closure notes	Visible closure inference — confirm before production. Closure was recorded as a boolean; designer must specify zipper/button/elastic.
Silhouette	Relaxed, straight-cut long-sleeved top with loose shorts ending around mid-thigh
Length style	Hip-length, ending around the upper hip
Ease note	—
Seam allowance	1 cm (default draft SA — not designer-approved unless confirmed)

REVIEW: Historical outfit-level color input preserved (“['Lavender-purple top', 'Golden-yellow shorts']”). Displayed garment color is derived only where visual/structured evidence supports a piece-specific value — not material composition.
REVIEW: Outfit color list was previously stored as shell name (“['Lavender-purple top', 'Golden-yellow shorts'] fabric”). Color and fabric are separated above — confirm shell quality.
REVIEW: Closure must be named (zipper type/length, button, elastic, etc.). Boolean placeholders such as “True” are not manufacturing specifications.

Technical flat drawings

AI PROFESSIONAL technical illustrations generated from the Magic look image. DRAFT / UNVERIFIED. Pattern sheets remain NOT TO SCALE — patternmaker validation required.

Vision summary — silhouette: Long-sleeve hooded sweatshirt with a straight body and set-in sleeves; neckline: Center-front opening extending into a hood; hood opening has no visible separate neckline binding; sleeves: Long sleeves with gathered folds and wide matching cuffs; pattern: Solid color; no visible print (None).

FRONT — AI FLAT

PROPOSED BACK — UNVERIFIED

PROPOSED BACK: No real Magic back image was available. Back construction is proposed for designer confirmation — not confirmed rear detailing.

Garment detail illustrations — TOP — Top

UNVERIFIED DETAIL ART: Detail artwork has not been independently visually confirmed for this garment. Artifact↔piece IDs and analysis text are not proof of correct image content.

Measurement specification — TOP — Top

Finished-garment points of measure for this top only (cm). Body measurements are listed separately on the outfit overview. Calculated/AI values require designer review.

Point	Value	Source	Confidence	Note / assumptions
Hem circumference	110 cm	Designer	unknown	Hem
Armhole circumference	45 cm	Designer	unknown	Armhole
Neckline / collar	45 cm	Designer	unknown	Neckline / collar
Chest / bust circumference	100 cm	Designer	unknown	Chest / bust
Sleeve length	60 cm	Designer	unknown	Sleeve length
Garment length (HPS to hem) · REVIEW	110 cm	Designer	unknown	Garment length
Shoulder width	45 cm	Designer	unknown	Shoulder width

Bill of materials

Item	Qty	Unit	Source	Notes
Shell fabric — NOT CONFIRMED · NEEDS REVIEW	estimate TBD	m	Estimate	Was: ['Lavender-purple top', 'Golden-yellow shorts'] shell. Width/weight unknown until confirmed Removed outfit-level color list used as fabric name; enter real shell quality.
Thread	1	cone	Estimate	Match shell
Care / brand label	1	set	Estimate	—

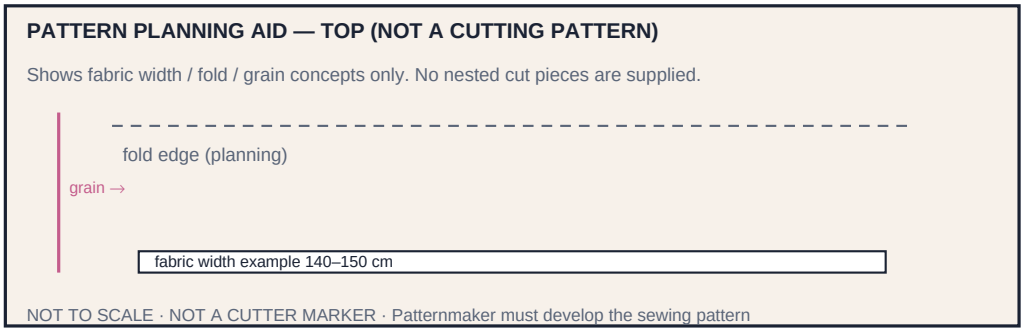

Pattern piece development — TOP — Top

PATTERN DEVELOPMENT SCHEMATICS — NOT TO SCALE. These are planning illustrations, not production-validated cut patterns.
Approved template pieces vs AI-proposed additions are labeled in notes. Uncertain cut quantities stay blank — never invented.

ID	Name	Cut	Fabric	Grain / fold	Review	Notes
front_body	Front body, left and right	2	shell	straight / none	Proposed · unverified	Separate front panels with center-front zipper edges — illustrative inventory, not a verified cutting pattern
back_body	Back body	1	shell	straight / none	Proposed · unverified	Cut on fold if desired; shoulder and side seams — illustrative inventory, not a verified cutting pattern
sleeve	Long sleeve	2	shell	straight / none	Proposed · unverified	Set-in sleeve with cuff attachment — illustrative inventory, not a verified cutting pattern
hood	Hood panels	2	shell	straight / none	Proposed · unverified	Visible panel seam; exact hood panel configuration is not fully discernible — illustrative inventory, not a verified cutting pattern
cuff	Sleeve cuff	2	shell	straight / none	Proposed · unverified	Wide matching cuffs — illustrative inventory, not a verified cutting pattern
hem_band	Bottom hem band	1	shell	straight / none	Proposed · unverified	Continuous band; may be cut as a loop — illustrative inventory, not a verified cutting pattern
drawcord	Hood drawcord	2	shell	straight / none	Proposed · unverified	One cord at each hood opening eyelet; visible metal end tips — illustrative inventory, not a verified cutting pattern

Cutting layout / pattern development

Sample development: an actual sewing pattern is **not** supplied with this pack. A patternmaker must develop the pattern from confirmed POMs and construction. NOT-TO-SCALE schematics are planning aids only — not usable cutting patterns.
Pattern-sheet illustration was not generated for this run (optional budget skip or unavailable). This is not a completed cutting layout.

Construction process

Default seam allowances and generic sewing steps are draft aids only — not designer-approved construction unless explicitly confirmed.

1. Staystitch neckline and fuse interfacing where required. (Estimate)
2. Join shoulder seams; finish with overlock or clean finish. (Estimate)
3. Set sleeves or finish armholes for sleeveless design. (Estimate)
4. Attach collar/neck finish; topstitch as designed. (Estimate)
5. Close side seams; finish hems and cuffs. (Estimate)
6. Install closure (buttons/placket/zipper) and press. (Estimate)

Component: BOTTOM — Shorts

Category: shorts · Garment color: golden yellow · Detection: heuristic

Materials & construction identity

Garment color	golden yellow
Color evidence	visually supported analysis
Shell material	cotton
Composition	Unknown / not confirmed
Fabric structure	knit/woven — not confirmed
Stretch	not confirmed
Weight / GSM	not confirmed
Lining	—
Rib / band	—
Closure / fastener	Centered front fly seam is visible; fastening details are obscured by the hoodie
Closure notes	Visible closure inference — confirm before production.
Silhouette	Straight-leg, relaxed shorts
Length style	Above-knee to near-knee length
Ease note	—
Seam allowance	1 cm (default draft SA — not designer-approved unless confirmed)

REVIEW: Historical outfit-level color input preserved (“['Lavender-purple top', 'Golden-yellow shorts']”). Displayed garment color is derived only where visual/structured evidence supports a piece-specific value — not material composition.
REVIEW: Outfit color list was previously stored as shell name (“['Lavender-purple top', 'Golden-yellow shorts'] fabric”). Color and fabric are separated above — confirm shell quality.

Technical flat drawings

AI PROFESSIONAL technical illustrations generated from the Magic look image. DRAFT / UNVERIFIED. Pattern sheets remain NOT TO SCALE — patternmaker validation required.

Vision summary — silhouette: Straight-leg, relaxed shorts; neckline: Not applicable; sleeves: Not applicable; pattern: Solid, with no visible print or stripe (None visible).

FRONT — AI FLAT

PROPOSED BACK — UNVERIFIED

PROPOSED BACK: No real Magic back image was available. Back construction is proposed for designer confirmation — not confirmed rear detailing.

Garment detail illustrations

MISSING / EXCLUDED: Owner QA: detail sheet linked to shorts ID visually shows hoodie construction (zipper/hood/sleeve). Original file preserved; exclude from corrected preview — do not treat as shorts manufacturing evidence. Original file and provenance are preserved; another garment's artwork was not substituted.

Measurement specification — BOTTOM — Shorts

Finished-garment points of measure for this shorts only (cm). Body measurements are listed separately on the outfit overview. Calculated/AI values require designer review.

Point	Value	Source	Confidence	Note / assumptions
Hip circumference	110 cm	Designer	unknown	Hip
Thigh circumference	—	Empty	unknown	Thigh
Waist circumference	75 cm	Designer	unknown	Waist
Inseam · REVIEW	80 cm	Designer	unknown	Inseam
Outseam	—	Empty	unknown	Outseam

Pattern piece development — BOTTOM — Shorts

PATTERN DEVELOPMENT SCHEMATICS — NOT TO SCALE. These are planning illustrations, not production-validated cut patterns.
Approved template pieces vs AI-proposed additions are labeled in notes. Uncertain cut quantities stay blank — never invented.

ID	Name	Cut	Fabric	Grain / fold	Review	Notes
F	Front leg	2	shell	straight / none	Proposed · unverified	Include front rise and fly extension; confirm fly construction from garment inspection. — illustrative inventory, not a verified cutting pattern
B	Back leg	2	shell	straight / none	Proposed · unverified	Back details are not visible; shape and any back pockets require confirmation. — illustrative inventory, not a verified cutting pattern
PKT	Front patch pocket	2	shell	straight / none	Proposed · unverified	Large patch pockets, topstitched; exact shape to be confirmed from reference or sample. — illustrative inventory, not a verified cutting pattern
WB	Waistband	1	shell	straight / none	Proposed · unverified	Waistband construction is hidden by the hoodie; confirm whether separate or self-fabric. — illustrative inventory, not a verified cutting pattern
FLY	Fly facing or fly shield	1	shell	straight / none	Proposed · unverified	Suggested only if a conventional fly is confirmed; fastening is not visible. — illustrative inventory, not a verified cutting pattern

Cutting layout / pattern development

Sample development: an actual sewing pattern is **not** supplied with this pack. A patternmaker must develop the pattern from confirmed POMs and construction. NOT-TO-SCALE schematics are planning aids only — not usable cutting patterns.
Pattern-sheet illustration was not generated for this run (optional budget skip or unavailable). This is not a completed cutting layout.

Construction process

Default seam allowances and generic sewing steps are draft aids only — not designer-approved construction unless explicitly confirmed.

1. Sew darts/pleats if present; assemble pocket bags. (Estimate)
2. Join front crotch; install fly/closure if designed. (Estimate)
3. Join back crotch; sew inseams then outseams (or as preferred sequence). (Estimate)
4. Attach waistband with even ease distribution. (Estimate)
5. Hem legs; press creases only if design requires. (Estimate)
6. QC: rise balance, waistband seat, closure function. (Estimate)

Manufacturing readiness & review

Current readiness: DESIGN CONCEPT / DRAFT. Levels: DESIGN CONCEPT / DRAFT → SAMPLE-DEVELOPMENT READY → PRODUCTION APPROVED (reserved for separately verified approval). AI completion alone never grants SAMPLE-DEVELOPMENT READY or PRODUCTION APPROVED.
No production sewing pattern is supplied. NOT-TO-SCALE schematics are planning aids only. A patternmaker must develop the sample pattern from confirmed POMs and construction.

Missing requirements for SAMPLE-DEVELOPMENT READY

• designer_confirmation_checklist
• named_sample_size
• piece-900064b0:closures_specified
• piece-900064b0:construction_decisions
• piece-900064b0:finished_poms_confirmed
• piece-900064b0:fit_ease_reviewed
• piece-900064b0:major_conflicts_resolved
• piece-900064b0:material_specified
• piece-900064b0:pom_tolerances
• piece-900064b0:waist_hip_inseam_poms
• piece-d070bdee:chest_and_length_poms
• piece-d070bdee:closures_specified
• piece-d070bdee:construction_decisions
• piece-d070bdee:finished_poms_confirmed
• piece-d070bdee:fit_ease_reviewed
• piece-d070bdee:major_conflicts_resolved
• piece-d070bdee:material_specified
• piece-d070bdee:pom_tolerances

Per-garment completeness

Top (top) — NEEDS REVIEW
• Garment length (HPS to hem) = 110 cm is outside the usual 45–85 cm band for a top. Designer value preserved — confirm measuring method (High point of shoulder (HPS) straight down to hem.) or correct the value before sample development.
• HPS-to-hem length = 110 cm but the design notes describe a hip-length top. Confirm whether this is a full-body / dress length or a data entry error.
• Body bust = 100 cm and finished chest = 100 cm with relaxed fit. Confirm intentional zero ease / stretch, or correct values.
• Category “top” requires explicitly confirmed finished POMs ['chest_bust', 'garment_length', 'shoulder_width', 'sleeve_length'] (source=designer alone is insufficient). Present but not review-confirmed (open/needs_review/AI/estimate): ['chest_bust', 'garment_length', 'shoulder_width', 'sleeve_length'].
• Fit/ease for “Top” lacks explicit review confirmation. Provenance-only designer source does not count.
• Shell material/composition for “Top” must be explicitly confirmed (color lists, estimates, and open review are insufficient).
• Closure/fastener for “Top” is unconfirmed. Boolean placeholders, AI guesses, and open review are not manufacturing specs.
• Construction decisions for “Top” are missing or only generic defaults. Explicitly confirmed steps are required.
• POM tolerances for “Top” are not explicitly confirmed for the intended sample.
• Detail artwork has not been independently visually confirmed for this garment. Artifact↔piece IDs and analysis text are not proof of correct image content.
• Back flat is PROPOSED (no real Magic back) — designer confirmation required.

Shorts (shorts) — NEEDS REVIEW
• Inseam = 80 cm is outside the usual 5–35 cm band for a shorts. Designer value preserved — confirm measuring method (Crotch seam to hem along inner leg (finished garment).) or correct the value before sample development.
• Shorts finished inseam = 80 cm while the silhouette describes mid-thigh / above-knee shorts. Confirm measuring method or correct the POM.
• Body waist = 90 cm but finished waist = 75 cm without confirmed stretch/elastic construction. Confirm elastic/drawcord/knit stretch or correct measurements.
• Body hip = 110 cm and finished hip = 110 cm with regular/relaxed fit claimed. Finished garment usually needs ease — confirm skin-tight intent, stretch fabric, or correct POMs.
• Category “shorts” requires explicitly confirmed finished POMs ['waist', 'hip', 'inseam', 'front_rise', 'leg_opening'] (source=designer alone is insufficient). Present but not review-confirmed (open/needs_review/AI/estimate): ['waist', 'hip', 'inseam', 'front_rise', 'leg_opening'].
• Fit/ease for “Shorts” lacks explicit review confirmation. Provenance-only designer source does not count.
• Shell material/composition for “Shorts” must be explicitly confirmed (color lists, estimates, and open review are insufficient).
• Closure/fastener for “Shorts” is unconfirmed. Boolean placeholders, AI guesses, and open review are not manufacturing specs.
• Construction decisions for “Shorts” are missing or only generic defaults. Explicitly confirmed steps are required.
• POM tolerances for “Shorts” are not explicitly confirmed for the intended sample.

• Owner QA: detail sheet linked to shorts ID visually shows hoodie construction (zipper/hood/sleeve). Original file preserved; exclude from corrected preview — do not treat as shorts manufacturing evidence.
• Back flat is PROPOSED (no real Magic back) — designer confirmation required.

Legend

Designer-entered = value present from the designer (provenance only — not manufacturing approval). **Confirmed** = explicitly designer-confirmed / visual-QA accepted for sample development. **Proposed** = AI or default draft (backs, generic SA, inferred closures). **Unresolved** = blocking SAMPLE-DEVELOPMENT READY until corrected. Designer-entered values are **not** automatically confirmed specifications.

Designer confirmation checklist

[ ] Outfit piece categories confirmed
[ ] Body vs finished measurements separated
[ ] Implausible measurements reviewed
[ ] Schematics labeled NOT TO SCALE
[ ] Patternmaker sign-off before production

Coordination notes: for multi-piece outfits, keep colorways and size consistency aligned across components. Patternmaker must validate seam allowances, notches, and graded sizes before any production cut. Do not treat default construction steps as approved manufacturing instructions.

AI generation identification

This export is a **PDF-only update**: $0 assembly that reuses stored AI Professional illustrations from a historical paid source run. No new provider calls. Still DRAFT / UNVERIFIED. Pattern sheets NOT TO SCALE.

Generation mode	PDF-only update ($0 assembly · reused AI Professional arts)
